

RFID Scanners for the CC Container

Verify and check your CC Containers

Nordic ID green Sector PL3000 Simple RFID

List prices from € 1,123.00

Robust and Versatile

Suitable if you handle large quantities of CC Containers daily, and recommended to e.g. transport companies, wholesalers, retailers and garden centres, that require increased power and more features from their scanner.

The Nordic ID Green Sector PL3000 simple RFID provides outstanding performance in reading RFID, and is able to integrate with logistics and shop floor systems. The RFID reader is certified for RFID CC Container reading and is delivered with preinstalled CC Container RFID tag reading application.

Nordic ID PL3000 Cross Dipole RFID

List prices from € 3,060.00

Superior RFID scanner

Suitable for even the most demanding environments where large quantities of CC Containers must be recorded accurately and quickly every day.

The Nordic ID PL3000 Cross Dipole RFID is the handheld scanner that meets the demanding supply chain requirements in the horticultural industry. With its cross dipole RFID antenna, tags can be read at a distance of more than 4 metres. Additionally, the reader is well suited for reading tags on individual sales items and barcode reading, when needed. The Nordic ID PL3000 Cross Dipole can be used with multiple RFID reading applications.

The Nordic ID Morphic RFID

List prices from € 893.00

This very small RFID reader combines the features of a mobile phone with the latest standard UHF RFID technology in one powerful device. A revolution in mobile technology.

PANMOBIL GSgun

List prices from € 767.00

Advanced options

The GSgun is able to quickly read and verify the CC Containers' RFID tags at a significant distance. With its large, circular antenna, it is very powerful, despite weighing only 469g, and can easily read from all angles.

The GSgun provides a vast range of additional benefits for your business processes. Depending on your choice of software, it is possible to incorporate additional registrations about CC Container shelves, corner posts, deliveries and other logistical information into your systems. GSgun is an open platform for logistic and warehouse applications. Data can easily be transferred to Excel, Word or other software at no extra cost. With an RFID reader, a built-in barcode reader and the graphic display even untrained users will be able to use the GSgun without difficulty.

PANMOBIL GSbasic

List prices from € 653.00

Compact and powerful

GSbasic is a powerful and compact scanner that can easily be carried at your belt. Scanning and checking can be done by running the scanner along the stack of CC Container bases at a distance of up to 10 cm.

The GSgun and the GSbasic can add value to your business processes, by allowing additional manual registrations of CC Container shelves, corner posts, deliveries and other logistic information – depending on your choice of software. Similarly, GSbasic is also an open platform for complex logistic- and warehouse applications. Likewise, data from the GSbasic can also be transferred directly into programmes such as Excel and Word.

PANMOBIL GSsmart

List prices from € 414.00

Small and low-cost

The GSsmart is one of the smallest RFID scanners in the market, suitable for simple verification of the CC Container. Despite the size it is a quite versatile RFID scanner with the ability to also read barcodes and integrate the information recorded into a range of logistics systems.
